Portfolio Website

Introduction

1. Project Title and Introduction

- Provide a brief introduction to your portfolio website.
- Explain its purpose, such as showcasing skills, projects, and experience.
- Mention that it is built using HTML, CSS, and JavaScript.

Example:
"This is a professional portfolio website designed to showcase my skills, projects, and experience. It is built using HTML, CSS, and JavaScript with a clean, modern, and fully responsive design."

---

2. Features

- List the key features of your portfolio:
    - About Me section with personal introduction.
    - Skills section showcasing technical and soft skills.
    - Project gallery with descriptions, images, and live links.
    - Contact form to allow visitors to reach out.
    - Responsive design for mobile and desktop views.
    - Interactive animations and smooth transitions (if JavaScript is used).
    - Dark Mode toggle (if implemented).

---

3. Technologies Used

- List the frontend technologies:
    - **HTML** for structuring the website.
    - **CSS** (or frameworks like Tailwind CSS or Bootstrap) for styling.
    - **JavaScript** for adding interactivity.
- Mention any additional libraries or frameworks:
    - FontAwesome for icons.
    - AOS (Animate on Scroll) for animations.
    - jQuery (if applicable).

---

4. How to Run the Project

Explain the steps to run the project locally.

Steps:

1. Open `index.html` in a web browser

5. Deployment

Explain where the portfolio is hosted and how others can access it.

- GitHub Pages https://github.com/Sindhubh1807

6. Future Enhancements

Mention any planned updates, such as:

- Adding a blog section.
- Improving accessibility and SEO.
- Integrating a backend for handling contact form submissions.
- Adding more animations or interactive elements

This description explains how to structure a **README** file for a **portfolio website** using HTML, CSS, and JavaScript. Let me know if you need any modifications! 🚀
